 TOKYO GAS

ガステナ〜に GAS SCIENCE MUSEUM

English

Think about Energy,
and Imagine the Future!

Our towns are full of energy.

Energy spreads from person to person,
connecting the present to the future,
increasing in strength and growing in size.

The Gas Science Museum is a place to
think about this energy.

What can energy do for people,
for the earth, and for our future?

From new ideas, new energy is created.

Let's imagine the future together.

And let's create it!

1F Gallery

Energy

Ponder the energy underpinning our lives, towns and society.

- ① What is a LNG Value Chain?
- ① What is electricity?
- ② What is power generation?
- ③ What are fuel cells?
- ④ What is combined energy?
- ⑤ What is a Smart Energy Network?
- Energy Studio

Disaster prevention

Learn practical, useful information about what to do in the event of a disaster.

- ⑥ What are earthquake and disaster prevention measures?
- ⑦ What is a microcomputer meter?
- ⑧ What roles does fire play?
